Forklift Training Tips
The checklist below is important for whichever workplace that has forklifts on the premises. Each of these questions should be answered with "yes" if all the safety rules and regulations are being followed. A "no" to any question indicates a procedural flaw that could result in injury, damage to machine or accident.

1) Is the traffic of the pedestrians separate from the operating are of the forklift?
2) Is access to forklift areas by pedestrians restricted by a barrier?
3) Are pedestrian walkways well marked and provided?
4) Are "forklift in operation" signs visibly clear?
5) Are mirrors for drivers and pedestrians provided at blind spots?
6) Changes or alterations to the daily forklift schedule has been communicated to staff?
7) Are forklift tires suitable for use on all operating surfaces?
8) Is the seatbelt being utilized?
9) Is the seat in good condition?
10) Is a regular forklift maintenance schedule adhered to?
11) Is an annual forklift inspection and certification carried out?
12) Is the forklift right for the needed job?
13) Is there a readable load chart on the forklift?
14) Do all operators understand how to read the load chart?
15) Does the chart list the safe capacity for various attachments and uses?
16) Do the forklift warning devices work right?
17) The speed operating control device is secured right?
18) Is overhead cage fitted right on the lift truck?
19) Have all forklift operators obtained certification?
20) Warning signs and speed limits are being observed?
21) The operators have current training for the lift trucks being utilized?
22) Do operators understand their responsibilities to report any equipment damage and lift truck accidents?
23) Prior to the machinery being utilized, the pre-test checklist is being reviewed each day?
